

Net Assurance

START

1

DISCOVERY

Create an existing baseline of the client's IT infrastructure, risks, vulnerabilities, assets, user configuration and activity using network detective. In a sense, we create an IT SWOT.

REMEDIATION

Develop a plan of action to resolve issues uncovered through discovery based on results of the SWOT.

2

3

RELATIONSHIP

Build a strong relationship through mutual trust, understanding, and communication.

ROAD MAP

Design a road map that integrates the right solution, with the right technology to achieve short and long term goals.

4

5

DELIVER RESULTS

Provide stellar consulting, best practices, planning, implementation, and support daily.
